

Sudo Bot v1.0.4 - Economy System Design

A Blueprint for High-Engagement Terminal Economy

1. Core Generation (The Grind)

/exploit

The primary work command. Users 'exploit' a remote node for data packets.

System Exploit Initialized

[#####-----] 80%

> ACCESS GRANTED

Data packet decrypted. You earned **142 Cores**.

/signal

Variable reward command. Scans for long-range frequencies. Rare but high payout.

Wide-Spectrum Scan

[SIGNAL ACQUIRED]

Large encrypted data cluster intercepted.

+2,500 Cores added to your Wallet.

2. High-Stakes Interaction (Gambling)

/crash

A fast-paced multiplier game. Multiplier rises until it crashes randomly.

System Multiplier: 2.45x

Current Profit: **490 Cores**

Click 'Withdraw' before the system crashes!

/hack-race

Social gamble. Two users bet Cores on who cracks a firewall first.

Brute-Force Competition

qilli0510: [#####----] 70%

Target: [#####-----] 50%

Winner takes the 2,000 Core pot!

3. Economy Sinks (Spending)

/blackmarket

Time-limited shop for rare system upgrades and customization.

Unsecured Terminal Found

Welcome to the underground. Available for **42m**:

- **Proxy Shield:** 50k Cores (Block /ssh-crack)
- **Gold UI Theme:** 250k Cores (Custom Fetch Color)
